Your patients deserve high quality, cost-effective care, and the consumerization of healthcare is prompting the need for mobile and digital platforms that provide anytime, anywhere access to information. To meet these needs, your organization can no longer afford to deal in paper and manual processes. Improve the patient experience while increasing the productivity of your staff and the efficiency of your supply chain with a fully digital solution.

Innovative healthcare leaders like AMN Healthcare, Cedars-Sinai, Children’s Hospital of LA, Integris Health, New York-Presbyterian, Nextgen, Novation, and UCSF are using DocuSign to improve care coordination, simplify regulatory compliance, and increase productivity. More than 100 US hospitals are DocuSign customers.

**Simplify Patient Onboarding**

No one likes sitting in an office with a clipboard: it’s time-consuming, error prone, and inefficient. Paper forms need to be scanned or re-keyed, rushed handwriting is hard to read, and patients often omit data. Digital forms cannot be submitted until they are 100% complete, and data is captured and automatically sent to back-end systems, enabling end-to-end electronic medical records.

**Improve Quality of Care**

With DocuSign, patients can fill out medical forms, completely and thoughtfully at their leisure, and physicians can review patients’ medical history, allergies, and medications before they walk in the door. DocuSign changes the nature of interactions among patients, physicians, payers, and other ecosystem players by allowing a more efficient and transparent flow of information and improved collaboration. Transactions can be completed on any device, and DocuSign is the only platform that offers native mobile apps for all major platforms (iOS, Android and Windows).

**Save Time in Staff Credentialing and Onboarding**

Doctors and nurses can’t practice until all credentialing forms are in place, and staffing agencies face delays in placing healthcare professionals while they wait for signatures. With DocuSign, staffing issues and paperwork bottlenecks won’t compromise your patients’ care. Get staff in place faster and more easily maintain their credentials over time with a fully digital process.

**Meet HIPAA Compliance**

To the extent DocuSign provides a secure environment for covered entities to manage their PHI, DocuSign enables healthcare providers to fully comply with their privacy and security requirements under HIPAA. Though DocuSign’s operating model
as a cloud provider is not explicitly covered by HIPAA, DocuSign will put BAAs in place with customers that have Enterprise accounts and want to improve their HIPAA compliance stance, provided the BAA includes a proper differentiation of DocuSign’s operating model. A signed BAA should be in place between DocuSign and the customer to enable the customer’s compliance prior to transmitting any PHI through DocuSign.

**Extend Technology Investments**

Leverage DocuSign’s award-winning REST and SOAP APIs to integrate DocuSign into nearly any application, website, portal or system. Our extensive partner ecosystem includes leading solutions such as Microsoft Office 365, Salesforce.com, SAP, Oracle, Box, and many others, as well as implementation partners like Deloitte and Accenture. DocuSign has been integrated into EMRs for select customers and partners, including one of the nation’s leading children’s hospitals.

**Healthcare Use Cases**

With DocuSign you can automate a wide variety of processes, including:

- New patient forms/onboarding
- Notice of privacy practices
- Consent forms
- Medical records updates
- Home healthcare patient documents
- Physician/nurse credentialing
- Provider agreements
- Medicare forms
- HIPAA compliance documentation
- Business Associate Agreements (BAAs)
- Vendor contracts
- Purchase orders
- Statement of work
- HR forms

**Sample Healthcare Customers**
