

Store Digital Agreements Securely and Compliantly with Electronic Vaulting

Financial institutions are increasingly issuing digital loans and leases to meet consumer expectations and prepare for the future after COVID-19. As these digital agreements increase in volume and value, institutions must safeguard the integrity of their documents. To meet modern security standards, companies need an electronic vault designed for digital transactions.

With Asset Vaulting by eOriginal, DocuSign customers can instantly deposit signed agreements into an electronic vault, establishing the Electronic Original® document. Identifying the certified Electronic Original® document builds trust among parties and offers legal protection in case of disputes. This process also creates a controlled environment to electronically search, manage, pool, securitize and transfer original documents.

Eliminate printing, postage and storage costs

Cut costs and save time by confidently committing to end-to-end paperless processes.

Accelerate time to funding

Transfer, collateralize or securitize Transferable Records in a faster and simpler manner while meeting statutory requirements and rating agency approval.

Improve productivity

Easily locate documents and grant privileged access to authorized users without resorting to paper or freezing system access.

Comply with statutory requirements

Ensure compliance with ESIGN, UETA, MERS, UCC Revised Article 9-105, SOP 50 10 5(K) Appendix 8 and more.

Easily integrate with existing systems

Integrate with existing imaging or document management systems to provide watermarked working copies while maintaining compliance and management of your original documents.

How it works

1 DocuSign

Digitally sign document

On almost any device from almost anywhere
Validate signer identity if necessary

2 eOriginal

Instantly deposit into eVault

Leverage prebuilt integrations that require no additional technical support
Permanently bind signatures to document
Store in encrypted, secure environment

3 eOriginal

Manage and audit throughout document lifecycle

Track all activities with tamper-evident audit trail
Grant access, transfer ownership, convert to paper and destroy documents as needed

Key capabilities

Custom access authorization

Grant internal or external parties access to individual transactions, portions of a transaction or a collection of transactions.

Custodian management

Allow secure and enforceable third-party access rights and privileges in compliance with the terms of custodian and collateral control agreements.

Retention policies

Set up retention policies based on the status or type of document to dynamically calculate destruction dates based on document activities.

Transfer of ownership or control

Facilitate the transfer of ownership or control of an Authoritative Copy between parties. The transfer process is defined by an offer, acceptance and confirmation. At each step, the buyer or seller may elect to reject or cancel the transfer. All actions are captured in the secure transaction audit trail.

Batch processing

Operate on a collection of transactions and documents such as transfer of ownership or transfer of custody on the collection.

Search & reporting

Save time with deep search and retrieval functionality, reuse common searches and customize views.

Paper In® & Paper Out®

Transfer from a signed Electronic Original® document to an admissible and transferable paper original and vice versa.

Certified Print®

Deliver an enforceable version of the contract and supporting documentation for a “court ready” evidentiary package.

Regular integrity checks

Consistently verify and ensure documents have not been altered or degraded since signing.

Model optionality

Implement e-vaulting in a way that works for your company through company-hosted, turnkey or on-demand system options.
