# **DocuSign**<sup>®</sup>

## Programmatically Manage Remote Online Notarizations

Manage notaries public for your organization with the Notary API, and combine with the eSignature REST API to assign and quickly trigger remote online notarization (RON) sessions.

## DocuSign Notary API

The DocuSign Notary API enables your organization to manage how you conduct remote online notarizations. To do this, you invite notaries public to your organization's notary pool, which lists them for easy inclusion in witnessing and electronic journaling tasks later. In your eSignature workflow, you can create an envelope with the notary public as a new recipient type. Documents are signed in the presence of a notary public and are thus deemed notarized, demonstrating that the signer's identity was verified, that the signature was witnessed, and that the documents were voluntarily executed.

### Features

#### Manage pools of notaries public

Use the Notary API to organize and separate your organization's notaries public into easy to manage groups called "pools."

#### Manage Notary users

Add or remove notaries public from your organization to manage who can perform RON acts in **supported states**.

#### **Check commission information**

Retrieve specific commission information from your notaries public, such as jurisdiction.

#### Create an envelope with a new Notary group recipient type

In your eSignature workflow, add this new recipient type to facilitate a RON session with a digital signature and tag with a notarization seal.

#### Dynamically redirect signers \*\*Coming Soon\*\*

Create and send envelopes, and retrieve session links to dynamically redirect signers through the RON session.

#### **Retrieve notarized agreements**

Following the RON session, retrieve the signed and notarized agreement with the Certificate of Completion.

#### Additional notes:

The Notary API encompasses a set of services that complement existing eSignature functionality. To use the full range of the Notary API's capabilities, you will need to make requests to both the eSignature API and the Notary API. You can use DocuSign Admin to manage your organization's notary pool and notary group activity, but DocuSign Admin is not required to use the Notary API.

## Notary relevant endpoints

Resource	Action	Route	Use Case
GlobalResources	GET	/identity_documents	Returns the options for supported identification documents
	GET	/notarial_acts	Returns the types of notarizations (oath, jurat, etc)
	GET	/notarization_types	Returns the variations of notarization (ron, ipen)
	GET	/seal_types	Returns the variations of seals (ron, ipen)
	GET	/states	Returns all states
Jurisdiction	GET	/jurisdictions/{jurisdictionId}	Returns a large set of information about a specific jurisdiction
	GET	/jurisdictions	Returns back all the enabled jurisdictions
Notary	GET	/notaries/{userId}	Returns back true if the caller has access to the user as a notary public, and the user is an active notary public
Pool	GET	/pools	Returns back the set of pools associated with the accountId
	POST	/pools	Used to create a new pool for linking to the account
PoolInvite	GET	/pools/{poolld}/invites	Returns all invites
	POST	/pools/{poolld}/invites	Used to send an invite to a notary public
	POST	/pools/{poolId}/invites/{poolInviteId}	Used to re-send a pending invite
	POST	/pools/{poolld}/invites/bulk	Creates a bulk action to invite notaries public
	DELETE	/pools/{poolId}/invites/{poolInviteId}	Used to delete a pending invite
PoolUser	DELETE	/pools/{poolId}/users/{userId}	Used to remove a notary public from a pool
	GET	/pools/{poolId}/users	Returns all users in the pool
User	GET	/users/{userId}	Returns back true if the user exists in the notary service, will also return the pools they belong to
UserJournalSession	GET	/users/{userId}/journal_sessions/pdf	Return an exported pdf of all the notary's journal entries
UserJurisdiction	GET	/users/{userId}/jurisdictions	Returns the commission for a user
	POST	/users/{userId}/jurisdictions	Used to create a commission for a user
	GET	/users/{userId}/jurisdictions/{jurisdictionId}	Returns a specific commission for a user
	PUT	/users/{userId}/jurisdictions/{jurisdictionId}	Used to update a specific commission for a user
	DELETE	/users/{userId}/jurisdictions/{jurisdictionId}	Used to delete a specific commission for a user
	GET	/users/{userId}/jurisdictions/{jurisdictionId}/ {sealType}	Returns the actual commission seal image

About DocuSign
DocuSign helps organizations connect and automate how they prepare, sign, act on and manage agreements. As
part of the DocuSign Agreement Cloud, DocuSign offers eSignature: the world's #1 way to sign electronically on
practically any device, from almost anywhere, at any time. Today, more than 750,000 customers and hundreds of
millions of users in over 180 countries use DocuSign to accelerate the process of doing business and to simplify people's lives.

**DocuSign, Inc.** 221 Main Street, Suite 1550 San Francisco, CA 94105
