

Speed Up Lending by Digitizing Agreements with DocuSign and nCino

If you are looking for a comprehensive, fully-integrated cloud bank operating platform that improves profitability, productivity, regulatory compliance and operating transparency across all lines of business for your financial institution. nCino/DocuSign can help make the end-to-end banking and lending experience a reality.

The nCino DocuSign E-Signature integration allows financial institutions (FIs) to interact with customers to process accounts and loans digitally and obtain signatures electronically. This integration provides:

- A digital and completely paperless banking experience for customers.
- An efficient and streamlined workflow for FIs.
- Automatic storage of e-signed documentation in Document Manager.

Use cases

-  Slash turnaround times for loans
-  Simplify commercial lending workflows
-  Minimize staffing burden for underwriting teams
-  Gain visibility into key metrics and KPIs
-  Automate approval workflows and tracking

Benefits

Accelerated agreements

By eliminating paper and manual steps, signature processes that used to take days can be completed in hours or minutes. Across the DocuSign eSignature customer base, 82% of agreements are completed in less than a day, 50% in less than 15 minutes.

Top-rated mobile app

DocuSign eSignature is the leader in mobile agreements. On both the Apple App Store and the Google Play Store, the DocuSign eSignature mobile app has an average of nearly 5 out of 5 stars. Responsive Signing automatically adapts documents for mobile to the size and orientation of the signer's device. No more needing to pinch and zoom around a shrunken PDF.

Legal validity

DocuSign eSignature is lawful in the United States, the European Union and most civil and common law jurisdictions for agreements. As a result, DocuSign eSignature is enforceable for most business or personal transactions around the world. Consult the DocuSign eSignature Legality Guide for country specific e-signature laws and requirements.

Enterprise-grade management and security

Use DocuSign with your organization's single sign-on infrastructure. Manage multiple DocuSign accounts across business units—including all users in those accounts—from an optional centralized administrative user interface.

Automated signature workflows

Route documents to multiple signers in serial, parallel or mixed sequencing. Define data fields to capture information during the signature step. You can even let your signer generate an agreement on demand from a template.

About DocuSign

DocuSign helps organizations connect and automate how they prepare, sign, act on and manage agreements. As part of the DocuSign Agreement Cloud, DocuSign offers eSignature: the world's #1 way to sign electronically on practically any device, from almost anywhere, at any time. Today, more than 750,000 customers and hundreds of millions of users in over 180 countries use DocuSign to accelerate the process of doing business and to simplify people's lives.
